Christo Jimmy

DevOps Engineer · Kubernetes · Multi-Cloud (Azure, AWS) · Platform Reliability

Bangalore, India | +91 9061180837 | christojimmmy@gmail.com | linkedin.com/in/christojimmy

SUMMARY

DevOps Engineer running production infrastructure for a healthcare SaaS platform across **Azure, AWS and Alibaba Cloud**, supporting multiple hospital and clinic clients in the UAE and India. Owns Kubernetes operations, CI/CD and infrastructure as code end to end, with deep hands-on experience in PostgreSQL recovery, observability, secure networking and audit readiness. Builds internal tools that automate routine operations, including AI-assisted observability on SigNoz and MCP.

Multi-cloud scale
3 clouds, AKS and EKS, multiple hospital clients in production

Automated delivery
GitOps pipelines with GitLab CI, Helm, ArgoCD and Terraform

Reliability
Production PostgreSQL recovery, monitoring and alerting

Security & compliance
Led ISMS/TPRM audit evidence and VAPT scoping

TECHNICAL SKILLS

Cloud	**Azure:** AKS, ACR, VNet peering, Application Gateway, Container Apps, Key Vault, Blob Storage **AWS:** EKS, EC2, ECR, S3, RDS, VPC, ELB, Route 53, SES, IAM, CloudWatch, Lambda, Auto Scaling **Alibaba Cloud:** ECS, OSS, HBR, RAM, ActionTrail | **GCP:** Compute Engine
Containers & GitOps	Kubernetes, Docker, Helm, ArgoCD, ingress-nginx
CI/CD	GitLab CI, Jenkins, tag-based promotion pipelines, Nexus, production release management
Infrastructure as Code	Terraform, Terragrunt, Ansible
Observability	Prometheus, Grafana, Loki, SigNoz, ELK Stack, Uptime Kuma, Ntfy, Dozzle
Data & Messaging	PostgreSQL (replication, WAL-G PITR, HAProxy), MongoDB, MySQL, Redis, Kafka, VerneMQ, Flyway, Sqitch
Networking & Security	IPsec site-to-site VPN, OPNsense/pfSense, FortiGate, DNS, SSL/TLS, ISMS/TPRM audits, VAPT
Healthcare	Healthcare integration services; connectivity to UAE health information exchanges (Malaffi, NABIDH)
Scripting & Dev	Bash, Python (FastAPI, FastMCP), SQL, PHP, MERN; Linux administration

PROFESSIONAL EXPERIENCE

DevOps Engineer | dWise Healthcare IT Solutions Pvt. Ltd (Lifetrenz) — 06/2023 – Present · Bangalore

Healthcare SaaS platform serving hospitals and clinics in the UAE and India

Platform & Cloud

- Run production and UAT Kubernetes for multiple hospital and clinic clients on **Azure AKS** and **AWS EKS**, including EKS version upgrades and add-on compatibility fixes.
- Designed a **hub-and-spoke Azure network** with Application Gateway host-based routing and internal load balancing for a multi-clinic production go-live in Abu Dhabi.
- Restored service in complex stateful-workload incidents: Kafka cluster ID conflicts, storage zone mismatches across Kafka, Redis, MongoDB and Loki, deprecated images, and AKS identity and quota limits.
- Led migration of on-premise applications and databases to the cloud, improving scalability and disaster recovery.

Delivery & Automation

- Built end-to-end pipelines with **GitLab CI, Jenkins, Helm and ArgoCD** that automate build, test and deployment; introduced tag-based releases that make every QA-to-UAT promotion immutable and traceable.
- Automated provisioning with **Terraform/Terragrunt and Ansible** for repeatable environment setup, and defined a region-based naming standard for new cloud regions.
- Shipped and supported Spring Boot, Angular, PHP and Python FastAPI services, resolving database migration and build-dependency conflicts that blocked releases.

Data Reliability

- Recovered broken PostgreSQL streaming replication and cleared a **96 GB** write-ahead-log build-up caused by an orphaned replication slot.
- Implemented **WAL-G point-in-time recovery** with documented runbooks on S3 and Azure Blob, extending to Alibaba OSS for production.
- Wrote a database risk assessment for management, using real incidents to make the case for moving PostgreSQL off Kubernetes.

Observability, Security & Compliance

- Operate monitoring on **Prometheus, Grafana, Loki and SigNoz** across client environments; designed log-based alerting to reduce mean time to detect.
- Led **ISMS/TPRM audit** evidence for a client production estate, finding **18 of 27** servers without backup policies plus encryption gaps, and wrote the restoration runbooks; scoped **VAPT** for the SOC audit.
- Migrated the office firewall to **OPNsense** with dual WAN and segmented networks, and built an IKEv2 **site-to-site VPN** to a client's Azure FortiGate.
- Connected healthcare integration services to the **Malaffi** HIE over secure VPN, and set up **AWS SES** email delivery and SMS-gateway routing for client applications.

Senior Technical Support | 24-7 Intouch — 02/2021 – 12/2022 · Bangalore

- Resolved complex networking, performance and crash issues for mobile gaming apps, and turned support trends into fixes with development teams.
- Mentored junior team members to improve resolution quality and team efficiency.

Digital Interaction Advisor | 24/7.ai — 08/2019 – 02/2021 · Bangalore

- Resolved real-time technical issues for digital banking customers and contributed to troubleshooting knowledge-base articles.

PROJECTS & INTERNAL TOOLS

AI-Assisted Observability | Python, FastMCP, SigNoz

- Built an MCP server that lets AI assistants query logs, traces and metrics, plus an error-analysis bot and a natural-language chatbot for service-health questions.

Launchpad | Web UI, Bash

- Self-service web app for running grouped server scripts such as deployments from a browser.

Canary Build Dashboard | MERN, Flutter, Linux

- One-click canary APK builds for 7 Flutter mobile apps on a headless build server, with artifact download.

AI Service Hosting | Docker, nginx, Azure, AWS, Terraform

- Containerized a FastAPI service with HTTP and WebSocket traffic behind a single ingress; evaluated Azure Container Apps and sized and costed an AWS EC2 deployment.

EDUCATION & TRAINING

Bachelor of Computer Applications (BCA) | SSR College of Science and Management Studies, Bangalore University — 2019 · 83%

Courses: AWS Cloud Architect, CCNA 200-301, DevOps

Languages: English, Hindi, Malayalam
